

As a license amateur radio operator, I value the contribution it has to the community. I am concerned that the HF and VHF signals sent onto power lines will increase the noise level on Amateur Radio bands and that this will undermine the ability of hams to serve the public interest in the event of a national emergency. I, therefore, ask that BPL not proceed until adequate site studies, with ARRL participation, have been conducted and there is a convincing demonstration that BPL will not cause harmful interference to Amateur Radio operations.

Sincerely yours,
Raphael Wong, AC4I
